Office Action Summary

Art Unit 1754

Claims 17-27 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" for carrying out the reaction in a pipe reactor. Applicant's argument, that the disclosure for carrying out the reaction in a pipe reactor is shown in Figure 2 and paragraphs [0024]-[0026] of the specification which provide a detailed description for carrying out the reaction in a pipe reactor, is not convincing, since Figure 2 and the specification refer to a pipe-cross reactor, as opposed to a "pipe" reactor. The term "pipe reactor" would be broader than the term "pipe-cross reactor", since a pipe reactor simply involves a pipe, as shown by Parker et al. '433, whereas a pipe-cross reactor involves two pipes which cross each other. Accordingly the term "pipe reactor" would be broader than the term "pipe-cross reactor", thus constituting new matter.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS
